ANTI-TENASCIN MONOCLONAL ANTIBODY THERAPY FOR LYMPHOMA

Abstract of the Disclosure

A method of treating lymphoma in a subject comprises administering to a subject afflicted with lymphoma an antibody that binds to tenascin in a therapeutically effective amount. Preferably the antibody is monoclonal antibody 81C6 or an antibody that binds to the epitope bound by monoclonal antibody 81C6. Preferably the antibody is labeled with or conjugated to a chemotherapeutic agent, particularly a radioisotope such as ¹³¹L.
